Pattern: 401/BLU-DETECT

Description: Detectamet Metal Detectable Locking Action Knife with Metal Detectable Handle

Detectamet Code: DTM0333 – Lambsfoot
DTM0334 – Sheepfoot
DTM0335 – Clip Point Blade
DTM0336 - Pruner

Handle moulded from Metal Detectable Plastic

General Instructions for Use

Keep the blade sharp. Keep the knife clean and dry. Keep the working parts lightly oiled using a good quality mineral oil. Always cut away from you. Use only for purpose for which it is intended.

Don't throw the knife. Don't use as a lever, pry bar, hammer, chisel or wedge.

Always work safely with tools and wear approved eye protection. Never use near live electrical circuits.

Strictly no retail sales to under 18's

Lock Instructions.

This knife features a blade which locks into the open position to minimise the risk of it accidentally closing while in use.

The lock is released by carefully pushing the locking-lever away from the base of the blade before folding the blade back into the handle.

Sharpening Instructions

To maintain the edge the blade must be sharpened correctly. The blade should be sharpened on an oilstone or a sharpening steel at an angle of approximately 20° to the stone or steel and not flat. The edge should be drawn across the sharpener from heel to point, taking alternate sides, using firm steady strokes becoming lighter when finishing. For best results sharpen little and often.
